Untitled section

1. What is React? *

- ☒ A JavaScript library for building user interfaces
- ☐ A database management system
- ☐ A programming language
- ☐ A CSS framework

2. Who originally developed React? *

- ☐ Google
- ☒ Facebook
- ☐ Microsoft
- ☐ Amazon

3. What does JSX stand for? *

- ☐ Java Syntax Extension
- ☐ JavaScript Extension
- ☒ JavaScript XML
- ☐ Java XML

4. Which of the following is a valid React functional component? *

- ☒ function App() { return <h1>Hello</h1>; }
- ☐ component App() { }
- ☐ React App() { }
- ☐ createComponent App() { }

5. What does a React component generally return? *

- ☐ SQL
- ☐ CSS
- ☒ JSX
- ☐ JSON only

6. What are props mainly used for? *

- ☒ Passing data between components
- ☐ Creating CSS files
- ☐ Calling APIs only
- ☐ Installing packages

7. Data using props generally flows from: *

- ☐ Child to parent
- ☒ Parent to child
- ☐ Server to CSS
- ☐ Browser to database

8. Which Hook is used to manage state in a functional component? *

- ☐ useEffect
- ☒ useState
- ☐ useRoute
- ☐ useComponent

9. What does useState() return? *

- ☐ Only a value
- ☐ Only a function
- ☐ A component and props
- ☒ A state value and a state updating function

10. What is the purpose of the setter function returned by useState? *

- ☒ To update the state
- ☐ To create JSX
- ☐ To install React
- ☐ To create a route

11. Which event is commonly used to detect changes in an input field? *

- ☐ onClick
- ☒ onChange
- ☐ onInputChangeReact
- ☐ onText

12. What is a controlled component? *

- ☐ A component controlled only by CSS
- ☐ A component controlled by the browser
- ☒ A form element whose value is controlled by React state
- ☐ A component without state

13. Which event is commonly used to handle form submission? *

- ☒ onSubmit
- ☐ onForm
- ☐ onSend
- ☐ onRequest

14. Which method is commonly used to render multiple items from an array? *

- ☐ forEachComponent()
- ☐ render()
- ☒ map()
- ☐ createList()

15. Why are keys used when rendering lists in React? *

- ☐ To style list items
- ☒ To help React identify list elements
- ☐ To encrypt list data
- ☐ To create routes

16. What is component composition? *

- ☒ Combining reusable components to build a larger UI
- ☐ Combining JavaScript files into one file
- ☐ Creating CSS variables
- ☐ Creating database tables

17. Which of the following is a utility-first CSS framework? *

- ☐ Bootstrap
- ☐ Styled Components
- ☐ CSS Modules
- ☒ Tailwind CSS

18. What is the main purpose of CSS Modules? *

- ☐ Making API calls
- ☒ Providing scoped CSS styles
- ☐ Managing application state
- ☐ Creating routes

19. Styled Components allows developers to: *

- ☐ Create databases
- ☐ Create routes
- ☒ Write component-based styles using JavaScript
- ☐ Fetch API data

20. Which of the following helps make React UI reusable? *

- ☒ Components
- ☐ SQL queries
- ☐ HTML pages only
- ☐ Server files

21. What are React Hooks? *

- ☐ HTML elements
- ☒ Functions that allow React features to be used in functional components
- ☐ CSS classes
- ☐ Database functions

22. Why were Hooks introduced? *

- ☐ To replace JavaScript
- ☐ To remove components
- ☒ To allow state and other React features in functional components
- ☐ To create HTML files

23. Which is a **rule** of Hooks? *

- ☒ Hooks should be called at the top level
- ☐ Hooks should only be called inside loops
- ☐ Hooks should only be called inside if statements
- ☐ Hooks should be called inside HTML

24. What does `useEffect` primarily handle? *

- ☐ CSS styling
- ☐ JSX creation
- ☒ Side effects
- ☐ Component naming

25. Which is an example of a side effect? *

- ☐ Declaring a variable
- ☒ Fetching data from an API
- ☐ Returning JSX
- ☐ Writing a CSS class

26. What does an empty dependency array `[]` generally mean in `useEffect`? *

- ☒ The effect runs after the initial render and doesn't re-run because of dependency changes
- ☐ The effect never runs
- ☐ The effect runs after every render
- ☐ The component is removed

27. What happens when `[data]` is used as the dependency array? *

- ☐ Effect runs only when age changes
- ☐ Effect never runs
- ☒ Effect runs when data changes
- ☐ Effect runs only once

28. What is a Custom Hook? *

- ☒ A reusable function containing React Hook logic
- ☐ A special HTML tag
- ☐ A CSS framework
- ☐ A routing component

29. A Custom Hook name should generally start with: *

- ☐ hook
- ☐ react
- ☒ use
- ☐ custom

30. Which Hook is used to consume Context data? *

- ☐ `useData`
- ☒ `useContext`
- ☐ `useProvider`
- ☐ `useStateContext`

31. Which browser API can be used to make HTTP requests? *

- ☒ `fetch()`
- ☐ `httpRequestReact()`
- ☐ `getAPI()`
- ☐ `requestData()`

32. What does `fetch()` return? *

- ☐ A React component
- ☒ A Promise
- ☐ A CSS object
- ☐ A number

33. Which method is commonly used to parse a JSON response using `fetch`? *

- ☐ `response.object()`
- ☐ `response.parse()`
- ☒ `response.json()`
- ☐ `response.convert()`

34. What is Axios? *

- ☐ A CSS framework
- ☐ A React Hook
- ☐ A routing library
- ☒ A library used for making HTTP requests

35. Which command installs Axios? *

- ☒ `npm install axios`
- ☐ `npm axios`
- ☐ `install axios`
- ☐ `npm install react-axios-router`

36. Which HTTP method is normally used to retrieve data? *

- ☐ POST
- ☒ GET
- ☐ DELETE
- ☐ PATCH

37. Which HTTP method is commonly used to create new data? *

- ☐ GET
- ☐ READ
- ☒ POST
- ☐ FETCH

38. What is routing in a web application? *

- ☒ The process of navigating between different views or URLs
- ☐ The process of styling components
- ☐ The process of creating a database
- ☐ The process of compiling JavaScript

39. Which **library** is commonly used for routing in React? *

- ☒ React Router
- ☐ React Navigation CSS
- ☐ React Route API
- ☐ React Pages

40. Which package is commonly installed for React Router in web applications? *

- ☐ react-router
- ☒ react-router-dom
- ☐ react-dom-router
- ☐ react-web-router

41. What is BrowserRouter used for? *

- ☐ Managing CSS
- ☐ Making API requests
- ☒ Providing routing functionality using the browser URL/history
- ☐ Managing Redux state

42. What is the purpose of the Route component? *

- ☒ To associate a URL path with a React element
- ☐ To make API requests
- ☐ To create CSS
- ☐ To manage state

43. Which component groups Route components? *

- ☐ RouteGroup
- ☐ RouterList
- ☒ Routes
- ☐ RouteContainer

44. Which component is commonly used for navigation in React Router? *

- ☒ Link
- ☐ NavigateLink
- ☐ RouterButton
- ☐ Route

45. What is client-side routing? *

- ☐ Every navigation requests a new HTML page from the server
- ☒ Navigation happens in the browser without a complete page reload
- ☐ Routing only happens in CSS
- ☐ Routing only happens in the database

46. What is nested routing? *

- ☒ A child route defined inside a parent route
- ☐ A route without a URL
- ☐ Multiple CSS routes
- ☐ A server-only route

47. What is the purpose of <Outlet /> in React Router? *

- ☐ To create a new browser window
- ☐ To make an API request
- ☒ To render the matched child route
- ☐ To update state

48. If Product is a parent route and Men is a child route, which URL represents the nested route? *

- ☐ /men-product
- ☐ /product-men
- ☐ /men/product
- ☒ /product/men

49. What is an index route? *

- ☒ The default child route of a parent route
- ☐ A route used only for APIs
- ☐ A deleted route
- ☐ A CSS route

50. Which route can be used to display a 404 page? *

- ☐ <Route path='404' />
- ☒ <Route path='*' element={<NotFound />} />
- ☐ <Route error='404' />
- ☐ <NotFoundRoute />
